7. PERFORMANCE AND EFFECT ON VALUE OF INVESTMENT

(i) **PERFORMANCE OF FORMULA, EXPLANATION OF EFFECT ON VALUE OF INVESTMENT** (*Structured Notes Only*)

The Notes may provide for an automatic early redemption linked to a specific event. Therefore, this may prevent the Noteholders from benefitting from the performance of the underlying instrument(s) over the whole period initially envisaged.

The terms and conditions of the Notes may include provisions under which upon the occurrence of certain market disruptions delays in the settlement of the Notes may be incurred or certain modifications be made. Moreover, in case of occurrence of events affecting the underlying instrument(s), the terms and conditions of the Notes allow the Issuer to substitute the underlying instrument(s) by new underlying instrument(s), cease the exposure to the underlying asset(s) and apply a reference rate to the proceeds so obtained until the maturity date of the Notes, postpone the maturity date of the Notes, early redeem the Notes on the basis of the market value of these Notes, or deduct from any due amount the increase cost of hedging, and in each case without the consent of the Noteholders.

Payments (whether in respect of principal and/or interest and whether at maturity or otherwise) on the Notes are calculated by reference to certain underlying(s), the return of the Notes is based on changes in the value of the underlying(s), which may fluctuate. Potential investors should be aware that these Notes may be volatile and that they may receive no interest and may lose all or a substantial portion of their principal.

During the lifetime of the Notes, the market value of these Notes may be lower than the invested capital. Furthermore, an insolvency of the Issuer and/or the Guarantor may cause a total loss of the invested capital.

The attention of the investors is drawn to the fact that they could sustain an entire or a partial loss of their investment.
