7. PERFORMANCE AND EFFECT ON VALUE OF INVESTMENT
(i) PERFORMANCE OF FORMULA, EXPLANATION OF EFFECT ON VALUE OF INVESTMENT *(Structured Notes only)*

Investment in Notes including fixed interest rate involves risks linked to the fluctuation of the market rates which could have negative effect on the value of these Notes.

Payments (whether in respect of principal and/or interest and whether at maturity or otherwise) on the Notes are linked to the occurrence or non occurrence of one or more credit event(s) relating to one or more reference entity(ies). If the calculation agent determines that one or more credit event(s) has(have) occurred, the obligation of the Issuer to pay the principal on the maturity date will be replaced by (i) an obligation to pay other amounts (either fixed or calculated by reference to the value of the deliverable asset(s) of the relevant reference entity, and in each case, which may be lower than the par value of the Notes on the relevant date), and/or (ii) an obligation to deliver the deliverable asset. Furthermore, credit linked notes paying interest(s) may cease to produce interest(s) at the credit event determination date or earlier.

During the lifetime of the Notes, the market value of these Notes may be lower than the invested capital. Furthermore, an insolvency of the Issuer and/or the Guarantor may cause a total loss of the invested capital.

The attention of the investors is drawn to the fact that they could sustain an entire or a partial loss of their investment.
