Taxation Switzerland

Swiss Federal Stamp Duty	For Swiss stamp duty purpose, the Product is treated as analogous to a bond. Therefore, secondary market transactions are in principle subject to Swiss stamp duty (TK22).
Swiss Federal Income Tax (for private investors with tax domicile in Switzerland)	For tax purposes this Product is classified as transparent, where the majority of the return of the bond part is in the form of a discount or of one payment on the Redemption Date (IUP). Therefore, for private Investors with tax domicile in Switzerland holding the Product as part of their private property, the increase of the value of the bond part (according to the "Modifizierte Differenzbesteuerung") at sale or at redemption is subject to the Federal Direct Tax. The present value of the bond part at issue is the Bondfloor per unit. An Investor who buys the Product at issuance and holds it until Redemption is taxed on the difference between

the Bondfloor at the Issue Date and the Bondfloor on the Redemption Date. However, any gain derived from the option is considered as capital gain and is therefore for such taxpayers not subject to the Federal Direct Tax. The tax treatment regarding the cantonal and communal income taxes can differ from the tax treatment regarding the Federal Direct Tax. But in general the income tax treatments are corresponding.

Swiss Withholding Tax The Product is not subject to the Swiss withholding tax.

On 1 January 2017 Switzerland has implemented the Automatic Exchange of Information in Tax Matters ("AEOI") with the EU and Australia, Jersey, Guernsey, Isle of Man, Iceland, Norway, Japan, Canada and South Korea. Switzerland is also negotiating the introduction of the AEOI with other countries. In this context the EU Savings Tax for Swiss paying agents and the Final Withholding Tax with UK and Austria was repealed.

The tax information is a non-binding summary and only provides a general overview of the potential Swiss tax consequences linked to this Product at the time of issue. Tax laws and tax interpretation may change at any time, possibly with retroactive effect.

Investors and prospective Investors are advised to consult with their tax advisers with respect to the Swiss tax consequences of the purchase, ownership, disposition, lapse or exercise or redemption of a Product in light of their particular circumstances. The Issuing Parties and the Lead Manager hereby expressly exclude any liability in respect of any possible tax implications.

Information with regards to bond floor taxation

Updated bondfloor information, if a bondfloor is applicable to the Product (according to "Product Details" and "Taxation Switzerland" herein), can be found on the following web page of the Swiss Federal Tax Administration (FTA): www.ictax.admin.ch. The Investor must be aware that for tax purposes the value of the bond floor is converted into Swiss Francs (CHF) at inception/purchase as well as at sale/redemption of the Product, in case the Product is denominated in another currency than CHF. Thus, the Investor is exposed to the foreign exchange risk with regard to the taxable income calculation and thus also the withholding tax calculation, if applicable. However, withholding tax on the bondfloor only applies if the Bondfloor at redemption (in %) is greater than the bondfloor at issuance (in %).

At redemption the Investor could receive a maximum amount corresponding to the invested capital (excluding any transaction or other costs) plus any additional (guaranteed and/or conditional) payments such as coupon or participation payments, bonuses or others.

On the downside, especially if the Product has forfeited any contingent capital protection (like e.g. a barrier, strike), the Investor

is exposed to the negative development of the Underlying(s). This might (even if a stop loss event has occurred) lead to a partial or even a total loss of the investment.

Please refer to the sections “Product Description” and “Redemption” for more detailed information on the characteristics of this Product.

III. Significant Risks

The terms and conditions of the Product may be subject to adjustments during the lifetime of the Product as set out in the Programme.

Investors whose usual currency is not the currency in which the Product is redeemed should be aware of their possible currency risk. The value of the Product may not correlate with the value of the Underlying(s).

Market Risks

The general market performance of securities is dependent, in particular, on the development of the capital markets which, for their part, are influenced by the general global economic situation as well as by the economic and political framework conditions in the respective countries (so-called market risk). Changes to market prices such as interest rates, commodity prices or corresponding volatilities may have a negative effect on the valuation of the Underlying(s) or the Product. There is also the risk of market disruptions (such as trading or stock market interruptions or discontinuation of trading) or other unforeseeable occurrences concerning the respective Underlyings and/or their stock exchanges or markets taking place during the term or upon maturity of the Products. Such occurrences can have an effect on the time of redemption and/or on the value of the Products.

No dividend payment

This Product does not confer any claim to receive rights and/or payments of the underlying, such as dividend payments, unless explicitly stated herein, and therefore, without prejudice to any coupon or dividend payments provided for in this Termsheet, does not yield any current income. This means that potential losses in value of the Product cannot be compensated by other income.

Credit Risk of Issuing Parties

Investors bear the credit risk of the Issuing Parties of the Product. The Products constitute unsubordinated and unsecured obligations of the relevant Issuing Party and rank pari passu with each and all other current and future unsubordinated and unsecured obligations of the relevant Issuing Party. The insolvency of an Issuing Party may lead to a partial or total loss of the invested capital.

Potential Investors should note that the Issuer is not rated by the credit rating agencies, i.e. there is no credit rating for the Issuer.

Secondary Market

The Issuer and/or the Lead Manager or any third party appointed by the Issuer, as applicable, intends, under normal market conditions, to provide bid and offer prices for the Products on a regular basis (if specified in the section “General Information”). However, the Issuer and/or the Lead Manager, as applicable, make no firm commitment to provide liquidity by means of bid and offer prices for the Products, and assume no legal obligation to quote any such prices or with respect to the level or determination of such prices. In special market situations, where the Issuer and/or the Lead Manager is/are unable to enter into hedging transactions, or where such transactions are very difficult to enter into, the spread between the bid and offer prices may be temporarily expanded, in order to limit the economic risks of the Issuer and/or the Lead Manager.

Illiquidity Risk

One or, if applicable, more of the Underlyings might be or become illiquid over the life time of the Product. Illiquidity of an Underlying might lead to larger bid/offer spreads of the Product and/or to an extended time period for buying and/or selling the Underlying respective to acquire, unwind or dispose of the hedging transaction(s) or asset(s) or to realise, recover or remit the proceeds of such hedging transaction(s) or asset(s) which might implicate a postponed redemption or delivery and/or a modified redemption amount, as reasonably determined by the Calculation Agent.
